

Home Improvements

Products for domestic fit-out

New standards in technology, design and comfort.

The Bohle Group has been a leading distributor of glass hardware products for decades. In recent times Bohle has begun to design and manufacture its own products, many of which you will find within this brochure. With our own in-house design and testing facilities, you can be satisfied that all Bohle products are reliable, efficient and most importantly fulfil the modern aesthetic consumers expect. Home improvements represent a profitable diversification opportunity for glass processors and glaziers. This brochure shows how you can easily incorporate glass into interior design projects.

MasterTrack® FT

The superior sliding glass door system, setting new standards in technology and design.

MasterTrack® FT is one of a range of sliding glass door systems available from Bohle, offering dual benefits of both high-quality design and function for interior settings. What is special about MasterTrack® FT is its revolutionary running gear and impressively smooth opening and closing. The fact it is so easy to install in only a few steps from the front means choosing MasterTrack® FT reduces installation time, making it incredibly cost-effective.

At a glance:

- Smooth and silent running even with door weights up to 150 kg
- For weights of 60, 80, 120 and 150kg
- Ceiling and wall mounting
- Double doors open simultaneously (optional extra)
- Installation with and without fixed sidelight
- Safe anti-jump mechanism
- Easy mounting from the front
- Soft closing mechanism

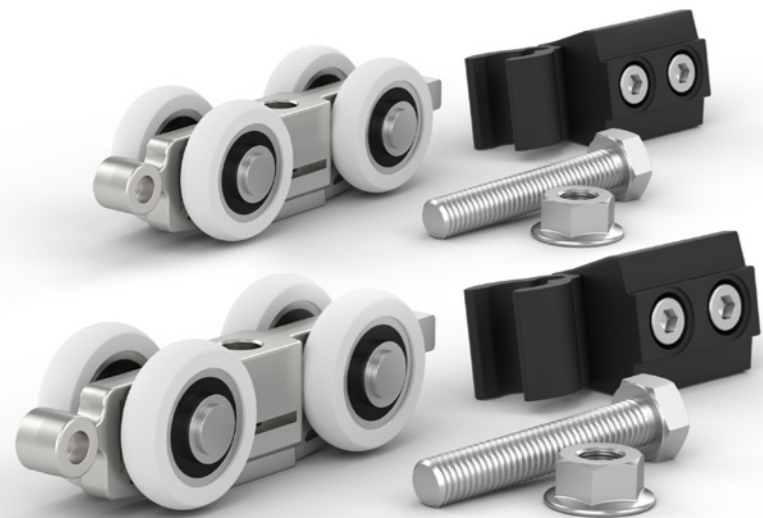

MasterTrack® FT

MasterTrack® BT

The MasterTrack® BT box track sliding door system is designed for use when the application requires more than basic ceiling or wall mounting. With the glass clamps suspended below the box track, MasterTrack® BT is perfect for single and multi-leaf doors in telescopic, flush ceiling or space saving pocket door applications. With MasterTrack® BT's modular system, there are no limits to interior design.

At a glance:

- For ceiling, wall and flush mounting
- Telescopic option also available
- Simple glass clamping mechanism for a secure hold
- Installation with and without fixed glazing
- Height adjustment +/- 3 mm
- Smooth closing mechanism
- Safe anti-jump protection
- Optional metal damper with high-quality hydraulics and a double-sided spring guide
- Synchronous opening possible

MasterTrack® BT

Pivot Door Hinges

Hydraulic Patch Fittings

Bohle supplies a range of patch fittings that combine both classic and attractive design with easy installation due to surface mounting – no underfloor box is required.

Excellent functionality for maximum safety without any compromise on aesthetics or quality. With adjustable closing speeds and available in range of finishes.

Alva Self-closing Patch Fitting

The Alva self-closing patch fitting enables a quick installation without problematic floor excavations which cause a lot of dirt. As the entire technology is concealed inside the slimline fitting, opening the screed for inserting the underfloor box is not required. The cover cap design is clear-cut and reduced to its essentials so that nothing interferes with the classy appearance.

Alva self closing patch fitting has been tested to European standards for long durability and excellent functionality in accordance with DIN EN 1154.

Balustrade Systems

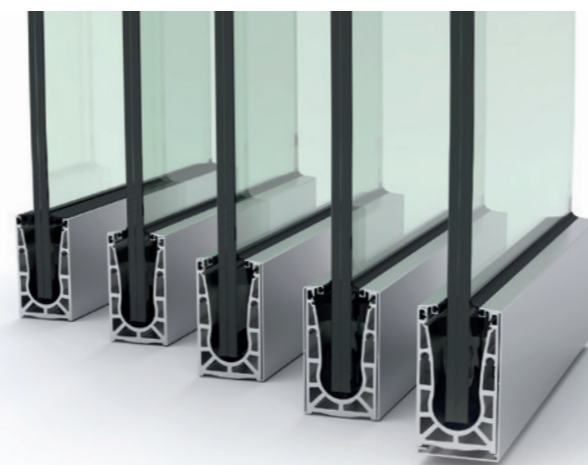

VetroMount®

Developed by Bohle engineers, the VetroMount balustrade system is a perfect example of what can be achieved with balustrades in the domestic environment. As with other Bohle products, VetroMount is highly engineered and designed to be both easy to install and visually appealing. Using the simple cable tie principle, installation is easy and quick and can be easily adjusted post-installation if needed, without the need for tools. For the homeowner, the result is a tasteful, modern and safe balustrade.

At a glance:

- Installed in 3 simple steps: Insert, adjust, fix
- Simple, time-efficient and cost-effective installation
- Revolutionary glass bearing units with patented locking mechanism
- Parts pre-prepared for installation
- Intelligent loosening mechanism for quick disassembly in case of adjustment

VetroMount®

Balustrades

Lyon Juliet Balcony System

Juliet Balcony Systems

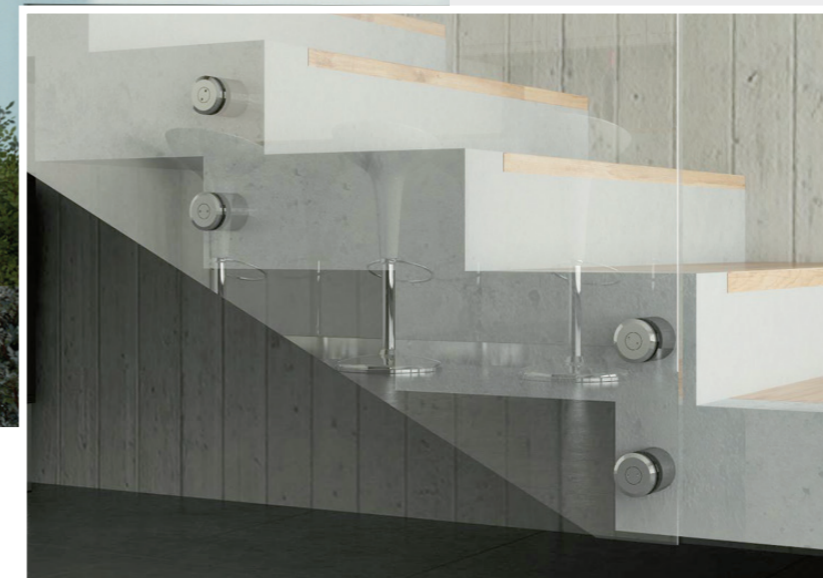

Bohle's Juliet balcony systems are almost invisible in use. They are quickly and easily mounted, with installation by means of a simple "slide and click" design. Offering an extremely cost-effective solution compared to other types of Juliet balcony systems, with no glass processing required, Bohle's Juliet Balcony Systems can accommodate glass widths of up to 4000 mm using one complete 2-part system. It has a completely frameless appearance from an internal viewing position, whilst still providing the necessary fall protection expected from a Juliet balcony.

At a glance:

- Quick and simple mounting
- No glass processing required
- Pre-assembled sets for the most popular glass thicknesses
- Aluminium anodised finish as standard
- Suitable for mounting on concrete/stone, plastic, wood or aluminium window frames
- With drainage channels
- RAL colours and mill finishes available by special request
- Other glass thicknesses available by special request
- With General Building Inspection Test Certificate ABP and BS6180

Clamps

For interior or exterior use, Bohle's range of clamps are for tempered and laminated safety glass up to a total thickness of 21.52 mm. They are manufactured of either diecast zinc or stainless steel, flat-backed or for tubes, and cover caps which match the finish of the clamps.

Single Point Fixings

Bohle's single point fixings, for interior or exterior use, are adjustable, easy to install and add a modern design touch to any construction project.

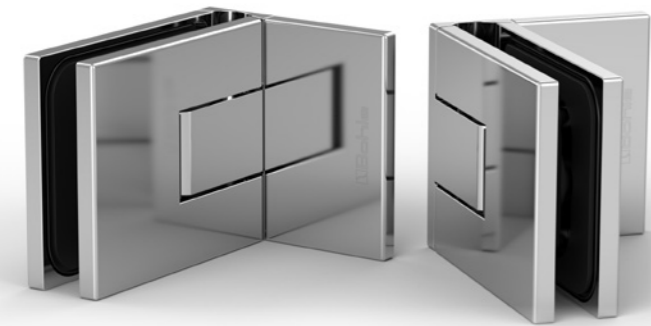

Shower Hardware

Over the last few years, Bohle has developed its range of shower hinges, door handles and knobs for bathrooms and these products are now among our most popular. They come in a range of styles and finishes to suit every bathroom installation to give a modern, stylish appearance. Here is just a sample of our extensive product range.

Juna Shower Door Hinge

The Juna shower door hinge combines aesthetics and functionality with quality and 'Made in Germany' workmanship. Minimum gap dimensions can concealed screws emphasise the quality of this swinging door hinge. Juna is tested to 100,000 cycles, has infinite zero position adjustment and comes with a 5 year warranty.

Bilbao Premium Shower Door Hinges

These hinges have a modern, square design and a self-closing function starting from an opening angle of +/- 15°. Outside this range, the hinge can stop in any position. Bilbao Premium also has an infinitely adjustable zero position, making the alignment of the door easy for the installer.

Juna

Aqua

Barcelona

Aqua Shower Door Hinges

Bohle Aqua shower door hinges offer an alternative to a conventional shower door hinge. The full length aluminium profile system combines elegant design with impressive functionality: an infinitely adjustable zero position, a raising/lowering mechanism as well as a $\pm 6\text{mm}$ vertical shim. No glass processing required.

Barcelona Select Shower Door Hinges

Barcelona Select has rounded off edges and creates a contemporary look for any shower, while being extremely sturdy and functional. The hinges have a self-close function starting from an opening angle of +/- 15°. Outside this range the hinge can stop in any position. Barcelona Select has an infinitely adjustable zero position making the alignment of the door easy for the installer.

Juna Shower Door Hinge

Shower Door Handles and Knobs

Our wide range of shower doorknobs and handles helps customise your shower enclosure to match the overall bathroom design. These come in a range of materials, finishes and shapes for all applications.

Reinforcement Bars

Bohle's reinforcement bars come as round or square, all with a timeless, modern design. They are the perfect mix of form and function! They can be trimmed to any desired length and no cut-outs or drill holes are required.

Stick-on Profiles

For achieving a modern industrial look, characterised by its black metallic elements, we recommend decorative transoms. They are bonded between existing profiles, enable the visual division of large glass surfaces and set strong accents. These are self-adhesive and can be cut to size as needed. Available in plastic or anodised aluminium.

MasterTrack® ST

Smooth running sliding doors for showers

Bohle has taken the already-proven technology of MasterTrack® FT for internal sliding doors and has applied it to shower installations.

MasterTrack® ST combines a simple modern design with easy installation and sophisticated technology. The system is equally applicable to recessed and corner showers, as well as detached showers. It can be installed as a barrier-free option, or with an unobtrusive threshold, where space is limited or for showers up to 2m. The technically sophisticated carriages and the patented all-metal dampers form the centrepiece of MasterTrack® and integrate into one well-balanced unit. High-quality ball bearings ensure a smooth and soft running. Its slim profile comes in aluminium-coloured or polished anodised.

At a glance:

- Effortless installation, maximum performance, elegant design
- Impressive running smoothness with high quality damping system
- No glass processing required
- Easy installation: It can be adjusted from the front
- Height adjustable by +/- 3mm

MasterTrack® ST

Aqua Drill Pro

Cordless Wet Drilling Machine

Experienced users know what happens if something goes wrong while drilling tiles or granite plates: frustration, loss of time, additional costs. This can all be avoided with the right equipment. Bohle's Aqua Drill Pro cordless wet drilling machine has everything you need to drill through the hardest materials quickly and, most importantly, without breakages. Two factors are important for break-proof drilling results: firstly, to keep temperatures low and secondly to exert as little pressure as possible. Aqua Drill Pro does it all. The permanent water supply and drainage enable optimum cooling, and the diamond drilling tools used guarantee maximum abrasion with minimum contact pressure. In combination with a drilling aid, which is available in three different versions, Aqua Drill Pro achieves full control when applying the drill, without undesired movement of the device.

With a torque of 90 Nm and a speed of 3,850 rpm, this is a powerful tool. The result is surprisingly quick and break-proof, as well as clean and contamination-free, drilling. In addition, Aqua Drill Pro can be used for both wet drilling or for screwing applications.

BriteGuard® Pro

BriteGuard® Pro is a transparent coating for all smooth glass and glazed ceramic surfaces which offers quick and reliable protection against corrosion. Crucially, an easy-to-clean surface is created which makes it hard for dirt particles to adhere to it!

Pre-clean, apply, wipe dry, done! The coating is suited both for interior and exterior applications and lasts for many years. The coating makes the glass surface hydrophobic and therefore easy to clean. Contamination barely sticks to the surface and water rolls off so aggressive chemical cleaning agents become unnecessary. Any silicone-free glass cleaner or suitable alcohol-based cleaners can be used for pre-cleaning.
